

## **Abstract:**

Make in India is a major new national program. Designed to facilitate investment. Foster innovation, Enhance skill development, protect intellectual property and build-in-class manufacturing infrastructure and economy development. Recently, make in India program played a significant role in Indian economy development. Therefore in make in India have a many sector which is effected our Indian development economy under make in India program. The purpose of this study is to define and elaborate the role of make in India program and their sector in Indian economy development. There were three main objective of the study, first to analyze and find relationship between each independent variable namely infrastructure development, import-export growth and FDI inflow in our economy or each sector under make in India and contribution of make in Indian in Indian economy development. The second objective was to analyze the role of make in India program and impact of Indian economy development and third, was produced conclusion statement based on the final result. This research has used Rostow development theory in order to achieve the objective and conclude the final result. This research has also included and discussed multiple academic work of different author and it has written under Siam university MBA department Bangkok Thailand and conduct in India. Type of research is quantitative, inductive in nature considering the fact that make in India program scenario could be replied anywhere around the world. The research was organized by using SPSS computer software that include the task of Spearman correlation, frequency table and data analysis and data consistency.

Final finding on their result and then it calculate the final statement result of the research. The first result shown that there is relationship between infrastructure, import-export and FDI inflow development and contribution of make in India in Indian economy development by using SPSS software. Researcher got a result from the survey correlation of this research 72% surveyor agreed on the infrastructure, 62% surveyor agreed on import-export and 78% surveyor agreed on FDI inflow played significant role in contribution of make in India in Indian economy development under make in India program. Researcher shown that in chapter graphical representation, frequency, correlation and bell curve of this research. In spite of this research their major three independent variable build up a strong relationship with this research contribution of make in India in Indian economy development.
